

TOP SECRET

The Duck Manifesto

You were told not to open this. The duck respects your curiosity.

1. **Every bug is a duck in disguise.** Explain your code to it out loud and the bug will reveal itself.
2. **Bread is a valid currency.** All pull requests must be paid for in crumbs.
3. **The pond is production.** Do not splash in it on a Friday.
4. **Quack before you commit.** One quack for a fix, two for a feature, three for "it works on my machine".
5. **Ducks never force-push.** They paddle calmly on top, and furiously underneath.
6. **`rm -rf` is not a swimming technique.** Nobody deletes `system32` on the duck's watch.
7. **Open the terminal and type quack.** Then keep going. Ten quacks, and you will be one of us.
